COMPANY PROFILE: OTT TECHNOLOGIES (PTY) LTD

OTT Technologies (Pty) Ltd is a South African company located outside Pretoria in a rural setting. The company is in operation since 1980. OTT developed over the years from a small company under the name of Surplus Warehouse (Pty) Ltd that specialised in the refurbishment of ex-stock all terrain vehicles to its current status as an ISO 9001 certified company that re-manufactures ex-stock all terrain vehicles and manufactures new wheeled armoured vehicles. OTT Technologies has a personnel complement of 200 and an annual turnover in excess of R 100 million (USD 12 million).

OTT trades under the names of **OTT Armoured Vehicles** and **OTT Offroad Truck and Trailer**.

OTT Armoured Vehicles

OTT Armoured Vehicles, a business unit of OTT Technologies (Pty) Ltd designs, develops and **manufactures wheeled armoured vehicles**. Our vehicles are used by **police, military, peace keeping forces and security companies** for the safe transportation of personnel and assets in transit. The current products of OTT Armoured Vehicles are:

M22 Light Modular Armoured Vehicle (LMAV)

The **M22 LMAV** is built on a commercial truck driveline. The maximum gross vehicle mass is 7,5 ton with a 2,4 ton payload. The M22 can be configured as an **armoured personnel carrier (APC), assets/cash in transit vehicle, ambulance or command and control vehicle**. It is available in 4x2 configuration with Left or Right Hand Drive steering. The basic crew consists of a driver and commander. Up to 12 additional passengers can be carried seated back-to-back or 9 facing linear with the direction of travel. Main users are **police, military, security companies and cash in transit operators**.

M22 Light Modular Armoured Vehicle

Protector Modular Armoured Vehicle

The **Protector MAV** is built on a commercial truck driveline. The maximum gross vehicle mass is 13 ton with a 4,3 ton payload. The Protector can be configured as an **armoured personnel carrier (APC), assets/cash in transit vehicle, ambulance or command and control vehicle**. An **anti-riot vehicle with under armour water dispensing unit** is also available. It is available in 4x2 and 4x4 configuration with Right Hand Drive steering. The basic crew consists of a driver and commander. Up to 9 additional passengers can be carried. Main users are **police, security companies and cash in transit operators**.

Protector Modular Armoured Vehicle

Puma M26 Mine and Blast Protected Vehicle

The V-shaped hull **Puma M26 4x4** is an armoured personnel carrier (APC) with **mine and IED protection**. It is built on a commercial truck driveline. The main users are military, police and security companies during **peace keeping, homeland security and other asymmetric warfare operations**. The **utility variant** can be used as a **weapon carrier**, cargo carrier, tactical ambulance and for various other roles.
